

### **IN THE SPECIFICATION**

Please cancel the original specification and substitute therefor the enclosed substitute specification. The original specification was a PCT application written in English translated from a German priority document and, as such, contained awkward syntax, and generally did not conform to standard U.S. practice. The substitute specification corrects these matters and will greatly facilitate prosecution of the application. Applicant submits that no new matter is injected into the application by way of the substitute specification. A marked-up copy of the specification is enclosed for the Examiner's reference.
